REPRESENTED IN NEGATIVE FILE	H.A.B.S. SURVEY NO. NC-4	Approx. date built: 1890 Present condition: fair	
PUBLISHED PHOTOGRAPHS	Custody: D.I.--G.S.M.N.P.		
PUBLISHED DRAWINGS	The mill consists of a pavoted with a bucket on one end and a wooden pestle on the other. A wooden mortar made of a log and set on end in the ground holds the grain as it is being pounded. Water from a small stream fills the bucket raising the pestle. As the bucket strikes the ground the water is spilled causing the pestle to drop.
